

VALV-TROL QUICK ACTING 3-WAY VALVES

1/2" to 3" NPT, 150 or 300 PSI (10 Bar or 21 Bar)

The **Valv-Trol Quick Acting, Loose Disc Valves** are diaphragm actuated valves used where remote operation is needed. Typical operations include steam heating, water cooling, water circulation, or liquid transfer. They are not intended for power hydraulic systems because of their loose discs and unbalanced design.

These valves have heavy cast bronze bodies and replaceable stainless steel trim for long service life with most liquids. The standard stem packaging is suitable for most liquids up to 500°F (260°C).

As with most of our valves this 3-way may be piped with any port to supply.

The Valv-Trol Advantage

Many parts of Valv-Trol Valves are interchangeable between the same size 2-way and 3-way valves. This helps you to reduce your spare parts inventory and allows us to maintain a more complete inventory for emergency availability and shorter lead times.

Our valves are all subjected to 100% pressure testing to ensure a drop tight seal before we ship to our customers.
